PEACE RING Project

- Spreading world peace through each bead -

TOHO BEADS started this project with the hope of spreading world peace and connecting people all over the world. We hope to make the world a better place where there will be no more war and hunger, food will be safe and accessible, and children can have a proper education.

The word "bead" has its roots in Old English with the meaning "to pray." By spinning each bead with needle and thread, let us work together to spread peace and pray for a safe world, full of love for children.

Peace (Beads) for the world!
